

January 6, 2023

Graham Research Inc. and Northwest Swiss-Matic, LLC are pleased to announce the acquisition of the assets of Northwest Swiss-Matic by Graham Research, effective December 30, 2022. Northwest Swiss-Matic will continue to operate out of its Brooklyn Park, MN facility as a division of Graham Research.

When the owners of Northwest Swiss-Matic made the decision to sell the company, it was important for them to find a partner that would continue to invest in the business and its employees. They found this in Graham Research Inc., a contract manufacturer based in Plymouth, MN, in operation since 1950 and under ownership of the Huston family since 1992. John Belmonte describes the transaction as “a complementary fit in terms of machining capabilities, aligning Northwest Swiss-Matic with a company that will continue to support and build on the company’s strong reputation in Swiss machining.”

John Huston, President of Graham Research also believes the transaction is a “perfect complement of machining expertise, enhancing Graham’s capabilities and capacity for our existing customer base while offering unrivaled expertise in Turning and Milling Machining to the customers of Northwest Swiss-Matic.”

Graham Research and Northwest Swiss-Matic together provide contract manufacturing services of mission critical components for the Defense, Aerospace, Medical and other commercial enterprises. Throughout its 70 plus year history, Graham Research has supported the United States defense industrial base via prime contractors to the Department of Energy. Graham Research’s focus is small, close tolerance, difficult to machine components made out of high nickel alloys with exacting surface finish requirements.

Graham is ISO 9001: 2015, AS 9100: 2016 and ISO 13485: 2016 certified, NIST SP 800-171 compliant, ITAR compliant/registered and is also registered in the U.S. Government’s System for Award Management. For further information visit: www.grahamresearch.com.

There will be separate customer communications related to changes in billing and payment processing. Please contact either John Huston at 763.553.1339 or john@grahamresearch.com or Wade Halseth at 763.544.4222 or whalseth@nswissmatic.com with any questions.

A handwritten signature in black ink, appearing to read "John Huston", is written over a horizontal line.

John Huston, President
Graham Research Inc.
